RESEARCH CONSENT FORM

Title of Study: Research Data Collection for Patients Seen in the V	Var Rel	lated Illness an	d Injury Study Center	•
Title of Consent (if different from Study Title):				
Principal Investigator: Peter Bayley, PhD	VAMO	C:	VA Palo Alto HCS	IRB# 74314

Are you participating in any other research studies? _____ yes _____no

What is this research about?

You are invited to participate in a research study on the effects of combat related injuries and illnesses. A component of the War Related Illness and Injury Study Center (WRIISC) is to study injuries and illnesses that result from combat and determine better methods to treat such illnesses and injuries. To do this, the WRIISC team will be utilizing wearable technology to gather clinical data. This data will be used to provide valuable information to WRIISC researchers as they pursue better treatments for combat illnesses and injuries.

As a patient of the War Related Illness and Injury Study Center, you have undergone many diagnostic tests related to your particular illness or injury. The WRIISC team is requesting your consent to include the results of these tests in the WRIISC database which will be analyzed and used to present information to the professional medical community via medical conferences and written materials such as journal articles. You will not be required to undergo any additional tests. Your data will be de-identified and stored on a VA computer server that is protected by a VA firewall.

What is expected of me? (Procedures)

If you decide to participate, you will be asked to wear a medical smartwatch wearable for 7 consecutive days and charge the device when the battery is low. You will also be asked to download a companion app on your personal smartphone, to which the wearable can sync via Bluetooth to continuously upload the collected data.

What are the possible risks or discomforts?

The risk associated with this study is the possibility of a loss or unauthorized disclosure of your clinical tests results. The WRIISC team will take every precaution to protect your data including removing identifying information from your data and storing it on a VA server that is administered by VA Office of Information and Technology employees and protected by the VA firewall. You also may experience mild discomfort from wearing a smartwatch wearable continuously for 7 days.

IRB Use Only proval Date: August 28, 2

Approval Date: August 28, 2024 Expiration Date: August 28, 2025

Will I benefit from the study?

WE CANNOT AND DO NOT GUARANTEE OR PROMISE THAT YOU WILL RECEIVE ANY BENEFITS FROM THIS STUDY. However, your data may contribute to new treatments for combat related illnesses and injuries. Your decision whether or not to participate in this study will not affect your medical care.

What are my alternatives to being in this study?

Since this study is not a form of treatment per se, the alternative to participation in this study is not to participate.

Will I get paid?

There is no payment for participation in this study.

Do I have to be in this study?

Participation is voluntary and a decision not to participate will not result in any penalty or loss of benefits to which the participant may be entitled.

Can I change my mind later and stop being in this study?

You can withdraw from the study at any time without penalty or loss of benefits to which they may be entitled.

Will my information be protected from the public?

Identifiers might be removed from identifiable private information and, after such removal, the information could be used for future research studies or distributed to another investigator for future research studies without additional informed consent from you.

The purpose of the data collected for this project is for scientific research only and there will be no attempt to identify directly or indirectly any subjects in the research data. We will keep your name and all the information you tell us in this study confidential as possible. We may publish the results of this study for others

Approval Date: August 28, 2024 Expiration Date: August 28, 2025

Authorization To Use Your Health Information For Research Purposes

The HIPAA (Health Insurance Portability & Accountability Act) allows you to control how health information about you is used. You have been asked to take part in the study listed above and this form provides an explanation about the use and disclosure of your health information and asks for your permission to use and share your individual health information.

What is the purpose of this study?

The primary purpose of this research program is to study on the effects of combat related injuries and illnesses. A component of the War Related Illness and Injury Study Center (WRIISC) is to study injuries and illnesses that result from combat and determine better methods to treat such illnesses and injuries. To do this, the WRIISC team will be utilizing wearable technology to gather clinical data. This data will be used to provide valuable information to WRIISC researchers as they pursue better treatments for combat illnesses and injuries.

The results of this research study may be presented at scientific or medical meetings or published in scientific journals. However, personal information or your identity will not be disclosed.

What Personal Information Will Be Used or Shared?

By agreeing to this document, your give the parties listed below permission to access and use the following health information about you for this research:

IRB Use Only
Approval Date: August 28, 2024
Expiration Date: August 28, 2025

Who May Use or Share Your Health Information

- Departments within the VA Palo Alto Health Care System responsible for the oversight, administration, or conduct of the trial.
- The Protocol Director (Peter Bayley, PhD) and members of the research team.
- The Stanford University Administrative Panel on Human Subjects in Medical Research and other Stanford University Officials responsible for the oversight, administration, or conduct of the trial.

Who May Receive and Use Your Health Information

The study team may need to share your information with the following parties as part of this research:

- Researchers from other WRIISC locations, for approved analysis research protocols.
- The Office for Human Research Protections in the U.S. Department of Health and Human Services

Approval Date: August 28, 2024 Expiration Date: August 28, 2025

We will protect your health information as required by all laws, however health information shared with others may no longer be protected by Federal laws or regulations and might be shared by the parties above.

Do I have to agree to this form?

No. Agreeing to this form is voluntary. The VA may not condition treatment, payment, enrollment or eligibility for benefits based on agreeing to this form. If you decide not to agree to the form, you will not be able to take part in this study.

If I agree now, can I decide later not to continue in the study?

Yes. You are free to take back your permission regarding the use and sharing of your health information and stop being in the study. If you take back your permission, the research team can continue to use information about you collected before you decided to take back your permission but will not collect any information about you going forward.

To take back your permission, you must write a letter to the researchers telling them you want to take back your permission or you can ask a member of the research team to give you a form to complete to take back your permission. If you take back this permission, you will not be able to continue to take part in the research. You mail your written request to the researchers by sending to:

Dr. Peter Bayley, 3801 Miranda Avenue (151Y), Palo Alto, CA 94304-1207.

Approval Date: August 28, 2024 Expiration Date: August 28, 2025

Use of your information to contact you regarding future studies:

The WRIISC and affiliated groups at the VA Palo Alto conduct studies on a

below if you g	ics related to physical and psychological health. Please indicate grant permission to contact you in the future regarding other nich you may be eligible to participate:
	Yes, I grant permission to use my information to contact me in the ing other studies.
	No, I do not grant permission to use my information to contact me in the future regarding other studies. (do not contact subject for future studies)

Who can I talk to if I have questions about the research, problems related to the study or if I think I've been hurt by being a part of the study?

Questions, Concerns, or Complaints: If you have any questions, concerns or complaints about this research study, its procedures, risks and benefits you should ask the Protocol Director, Dr. Bayley, (650) 493-5000 x68653. If you think you have hurt by being in this study, call Dr. Bayley at (650) 493-5000 x68653.

Alternate Contact: If you cannot reach the Protocol Director, please call a member of the research team at (650) 493-5000 x68653.

Appointment Contact: If you need to change your appointment, please contact Peter Bayley, PhD or a member of the research team at (650) 493-5000 x68653.

If you are not satisfied with how this study is being conducted, or if you have any concerns, complaints, or general questions about the research or your rights as a participant, and would like to speak with someone who is independent of the research, please contact the Stanford Institutional Review Board (IRB) to speak to someone independent of the research team at (650)-
