

GULF WAR VETERANS NEEDED

For Research on Balance

War Related Illness and
Injury Study Center
VA NJ Health Care System

385 Tremont Avenue,
11th floor
East Orange, New Jersey
07018

Loss of balance may be an unrecognized condition of Gulf War Illness.

Who do we need?

We are looking for men and women who served during Desert Shield/Desert Storm.

Purpose of the study

To explore whether we can see balance problems in Gulf War Veterans and if we can improve the underlying function of nerves that are important for balance by wearing a small stimulator just behind the ear.

Participation would involve up to 3 sessions lasting 3-4 hours each

Travel expenses will be covered by the research study for all out of town participants

In appreciation of your time, you will receive \$75 per study session
